

Thermo-regulating smart bed Petoneer Cozy Sofa

Thermo-regulating smart bed Petoneer Cozy Sofa

Ref: 6930460007148

Intelligent bed with thermoregulation Petoneer Cozy Sofa

Keep your pet comfortable. The bed has a thermoregulation function, so you can turn on the heating or cooling. The quiet operation of the device will not annoy your pet, and thanks to the carefully thought-out design, you can be sure that your furry friend will be comfortable. What's more, you can control the device via an app. In addition, the product is suitable for pets weighing up to 15 kg.

Thermoregulation function

Cozy Sofa was designed with cats and their comfort in mind. In summer, hot weather can be a nuisance for them, and when the temperature outside drops - they get cold. That is why the bed is equipped with the thermoregulation function so that its temperature is always optimal and adapted to the surrounding conditions. The use of high-quality materials ensures good heat conduction and the integrated sensor monitors the temperature in real time. Moreover, you can adjust the temperature by 9°C (heating) or 12°C (cooling).

Control from the app

Download the app to gain access to practical functions and conveniently control your bed. You can use the automatic temperature control option or set it manually between 20 and 38°C. Moreover, it is possible to set a timer which will allow you to adjust the device to your pet's habits - the bed will turn off when your cat wakes up and turn on when he goes to sleep.

Wireless connection

For added convenience, the unit uses a wireless connection so you can control it without having to get up from the couch. The Wi-Fi and Bluetooth module provides convenient setup and allows faster Bluetooth pairing to transfer Wi-Fi credentials.

Quiet operation, low power consumption

You don't have to worry about the unit's loud operation annoying your pet. The special design of the air ducts works in parallel with the turbo fan, so that the PN-110031-01 operates at ≤ 33 dB. What's more, the device consumes only 1 kWh over 4 days. So you don't have to worry about high electricity bills.

Sophisticated in every respect

The dog bed is designed to make your pet comfortable. Made of high-grade materials, as well as the oxidation of the housing guarantees durability and resistance to damage, and the minimalist design will look great in a modern interior. In addition, the LED indicator will provide you with the most important information about the operation of the device, so you can stay up to date.
