Wireless Bluetooth Speaker Tronsmart Halo 200 (black)

Tronsmart Halo 200 Bluetooth wireless speaker (black)

With Tronsmart you will discover new dimensions of your favorite songs! You will delight in their excellent sound and crisp bass, thanks to the speaker's high power output of up to 120 watts. What's more, you'll also use the device as a portable powerbank, thanks to its built-in USB-A port. In addition, during parties you can connect a microphone or guitar to it and lose yourself even more in the music.

Powerful sound

The Tronsmart wireless Bluetooth speaker is a true powerhouse, offering up to 120 watts. As a result, it delivers unparalleled, crisp bass and crystal clear highs. It's ideal for anyone who appreciates sound quality and doesn't want to give up the convenience of wireless technology. What's more, using the intuitive Tronsmart app, you can customize the sound and light according to your preferences, creating the perfect environment for your home entertainment or parties with friends.

Wireless connection

Tronsmart's equipment is equipped with modern and reliable Bluetooth 5.3 connectivity technology, which provides a stable and fast connection to your device even at a distance of up to 10 meters. This allows you to move freely around the room without worrying about interrupting audio transmission. In addition, the speaker is IPX4 waterproof certified, which means it is resistant to accidental splashes, making it the perfect companion when relaxing by the pool or at the beach.

Lighting effects

The Tronsmart wireless speaker not only provides excellent sound, but also impresses with lighting effects that are sure to enhance any party. Equipped with 5 different lighting modes, it will enchant everyone at the party. Experiment with colors and sequences to create unique and attractive effects that perfectly blend with the rhythms of the music and get your guests in the mood to party together.

Even more possibilities

The Tronsmart device opens the door to new possibilities. It allows you to connect a microphone as well as a guitar, making it an ideal choice for aspiring musicians looking to showcase their skills. NOTE: Before connecting a guitar, be sure to turn down the microphone volume using the microphone volume knob to achieve balance. The output signal of the guitar is larger than that of the microphone, so it is important to maintain a proper balance between the two to avoid sound distortion and maintain sound clarity.

Long runtime

The Bluetooth wireless speaker is designed to provide long-lasting support for your musical needs. Equipped with a powerful 15,000 mAh battery, it allows for long hours of playback. With the LEDs off, the speaker is capable of up to 18 hours (at 50% volume), while when using the karaoke function, the runtime is up to 10 hours (at 60% volume). Such impressive performance means you can enjoy your favorite tunes all day or even all night without worrying about the device draining.

Powerbank function

The Bluetooth wireless speaker not only delivers an exceptional sound experience, but also proves itself as a portable powerbank. The built-in USB-A port allows you to charge your devices even during outdoor adventures where access to an outlet may be limited. The speaker has a feature that automatically detects the connected device and starts charging it when the charging cable is plugged into the USB-A port in power mode. Now you don't have to worry about discharging devices during parties or trips - the speaker will not only provide you with great music, but also allow you to charge your essential gadgets.
