Monitor Koorui 24E4 23.8" 1920x1080px 165Hz

Looking for the perfect monitor to be the perfect companion for any gaming experience? The Koorui 24E4 features a 23.8" display that provides a wide color gamut for more realistic images. It boasts a refresh rate of 165 Hz, thus enabling smooth gaming sessions. Enjoy uninterrupted performance together with Koorui!

### Excellent quality monitor

The Koorui 24E4 is a 23.8-inch monitor with Full HD (1920 × 1080) resolution. With a 16:9 aspect ratio, it uses a VA panel that features an impressive contrast ratio of 20000000:1. Equipped with a display with 85% DCI-P3 color gamut coverage, it guarantees rich colors and smooth transitions between hues. As a result, users can enjoy images with stunning color reproduction and extremely precise details.

### Monitor for gamers

Immerse yourself in the world of gaming with an incredibly fast 165 Hz refresh rate that offers smooth images and sharpens every detail, enhancing the overall gaming experience. This technology provides gamers with a key advantage, especially in the world of e-sports. A fast response time of 1ms allows for near real-time gaming - a feature invaluable in fast-paced, competitive games. It's worth mentioning that the full 165 Hz capability can be used with a DP 1.2 cable. By comparison, the HDMI 1.4 port allows a maximum of 144 Hz.

### FreeSync technology

Ensure smoothness and performance at the highest level with the Koorui monitor, which uses FreeSync technology. This innovation eliminates problems such as stuttering, screen tearing and input lag while allowing you to maintain a high frame rate. It eliminates glitches and blurs, providing a clean and sharply delineated image. In addition, this monitor is compatible with G-sync technology, which translates into even more realistic image quality in computer games.

### Great compatibility

The Koorui gaming monitor features a wide range of interfaces, including two HDMI 1.4 ports, one DisplayPort 1.2 port and an audio output. For a customized fit, the monitor offers tilt adjustment from -5° to 15°, providing the optimal viewing angle for the most satisfying gaming experience.
