

Electric Vehicle charger type-2 Choetech ACG17 7 kW with LCD

Ref: 6932112105790

Electric Vehicle charger Choetech ACG17 7 kW with LCD display (black)

Choetech ACG17 7 kW type-2 electric car charger with LCD display (black).

Choetech ACG16 is a single-phase Type-2 plug-in charger for electric cars that guarantees fast and efficient charging. It is equipped with an LDC screen and 4 LED indicators that provide key information on charging status. From today you will gain confidence when your car is fully charged! The length of the charging gun cable is 5 meters, and its portable design, makes it possible for you to charge your electric vehicle in different locations, ensuring convenience and confidence that it will be ready to drive. In addition, the product is compliant with EU requirements. With Choetech, you'll be prepared for any circumstance!

With safety in mind

The charger is convenient to use, as it can be used in a wide variety of conditions. In addition, it is very durable. It also features an IP65 rating, which means that it is dust and waterproof. It won't be frightened by torrential rains! For full safety, it is also properly protected - it exhibits shock resistance, as well as overcurrent protection, surge protection and more! Therefore, you gain a guarantee of safe use.

Ease of use

The charger is fabulously easy to use - all you have to do is plug it into the charging station and into your car just like you plug a charger into your phone and a power outlet. What's more, it's also equipped with a 2.8-inch LDC screen and LED indicators, making it even easier to use.
