

Set of 3 filters PolarPro DiveMaster for GoPro 9/10/11/12 BI

Ref: 817465026380

Set of 3 filters PolarPro DiveMaster for GoPro 9/10/11/12 Black

Set of 3 PolarPro DiveMaster filters for GoPro Hero 9/10/11/12

A pack of 3 filters created for underwater use in combination with a waterproof case. Compatible with the GoPro camera Hero 9 / Hero 10 / Hero 11 / Hero 12, will allow you to take shots with a full cross-section of colors under the surface, leveling the saturation of blue or green. Each filter has been adapted to a different environment and depth to ensure comprehensive operation in all conditions.

Easy to use

The filters have been designed to allow for easy and quick installation. The slide-on design allows the filter to be changed in seconds by sliding it onto the lens. In addition, this mounting method is extremely secure, the glass will not slip off and will stay in place in any situation.

Extremely rugged and multi-tasking

Rugged design allows you to work in any conditions without worrying about damaging the filters. Made of polycarbonate plastic, they are extremely durable and scratch-resistant.

3 filters for all conditions

RED - works best in blue environments, at depths from 4 to 22 meters. MAGENTA - ideal in green tinted waters, with depths from 4 to 22

meters. SNORKEL - made for shallow water up to a depth of 4 meters.

Easy storage

The included case allows for safe and easy storage. The compact size will allow you to take the filters anywhere without worrying about losing or damaging them.
