Set of 3 Sunnylife A3-FI685 filters with adjustable CPL, CPL+ND8+ND1

Ref: 5905316148802

Sunnylife A3-FI685 Filter Set with CPL, CPL+ND8+ND1 Adjustment

Sunnylife filters faithfully reproduce colors while providing solid protection for your lens against scratches, moisture, and oil smudges. This is an excellent choice for both amateurs and experienced professionals aiming for perfect image quality in any conditions. The filter frames are made from ultra-lightweight aerospace-grade aluminum, ensuring exceptional durability.

CPL Filters - Unveil Natural Beauty

The CPL filter eliminates reflections from non-metallic surfaces and enhances colors. It is indispensable for shooting through glass, over water, or underwater, offering unique effects in various lighting conditions.

ND Filters - Master Light and Motion

The ND filter allows for precise control of the amount of light entering the camera, preventing overexposure and contributing to a deeper color palette and better color saturation. It also enables the reduction of shutter speed, allowing for the creation of blur effects that add dynamism and life to your photos, perfect for capturing the movement of flowing water in waterfalls or other dynamic scenes.

High Quality

The Sunnylife filter set is designed for the DJI AIR 3 camera. Made from aluminum and optical glass, with a weight of only 4g per filter and

compact dimensions, it ensures ease of use and transport. The set also includes an elegant case lined with soft EVA foam, providing secure storage for your filters during your travels.
