

Landing gear Sunnlyfe for DJI Mini 3 Pro (MM3-LG399)

Landing gear Sunnlyfe for DJI Mini 3 Pro (MM3-LG399)

Ref: 5907489609807

Sunnlyfe landing gear lift for DJI Mini 3 Pro (MM3-LG399).

The undercarriage boost increases the stability and safety of the drone during takeoff and landing. It increases them by 30mm, and thanks to its lightweight design (19.5g), it does not affect the flight of the DJI Mini 3 Pro. It does not need to be disassembled for storage, and the silicone pads provide cushioning and add unique style to the device.

Hassle-free operation

The solutions used in the accessory allow for hassle-free installation and removal of the product, without worrying about damaging or scratching any of the arms. The silicone strap is fully safe for our drone and durable. It does not block the vision and detection system.

Increased elevation

The distance between the ground and the drone, is increased by 30 mm, which ensures the stability and safety of the drone during landing. The legs fold outward for a fully stable and unobstructed landing. Meanwhile, the foldable landing gear allows for hassle-free transportation.
