Ref: 5905316148901

Landing gear Sunnlyfe for DJI Mini 4 Pro N4P-LG700-GY

Sunnlyfe N4P-LG700-GY Undercarriage Height Extension for Mini 4 Pro in Orange

Sunnlyfe N4P-LG700-GY is an attachable drone accessory that serves as a platform with four legs, which cushions the landing and protects the underside of the drone from coming into contact with the ground and potential damage. Moreover, the platform allows for landing on uneven and sandy surfaces without risking damage to the device's optics. The distance from the ground is increased by 30mm.

Installation

The mounting is extremely simple and involves placing the drone on the base, securing it with a strap, and fastening to the bottom part of the platform. The strap is soft and does not cause scratches, while also being durable.

Thoughtful Design

The design of the height extension has been precisely adapted to the drone's structure, ensuring that the battery is easily accessible and the lenses maintain full range of vision. The drone's legs have multi-level adjustment, as well as a stopper to prevent them from completely unfolding outward. However, the legs fold inward to facilitate transport.

Specifications

BrandSunnylife
ModeIN4P-LG700-GY
CompatibilityMini 4 Pro
Color of LegsOrange
Weight21g
MaterialPlastic, silicone
