

Set of filters MCUV, CPL, ND4, ND8 Sunnyslife for DJI AIR 3

Ref: 5905316148833

4 Lens Filters Sunnyslife for DJI AIR 3 A3-FI688 MCUV+CPL+ND4+ND8

Set of filters MCUV, CPL, ND4, ND8 Sunnyslife for DJI AIR 3

The Sunnyslife A3-FI688 is a set of lens filters designed for the DJI AIR 3, allowing users to expand their capabilities and enhance the quality and aesthetic value of their recorded materials. These filters are a perfect fit for the DJI AIR 3 drone.

MCUV Filter

The MCUV filter reduces the influx of ultraviolet light and improves light transmission. In mountainous and high-altitude environments, it increases depth and sharpness in photos. Additionally, the filter protects the lenses from damage.

CPL Filter

The CPL filter eliminates light reflected from non-metallic surfaces and enhances color depth, adding vibrancy and clarity to materials. It is commonly used for shooting through glass, water, and underwater scenes.

ND Filters

Depending on the filter's numerical value, ND filters reduce the amount of light hitting the sensor to prevent overexposure. Moreover, they enhance color saturation in photos and enable longer shutter speeds, making it possible to capture light trails at night, for example.

Package Contents

1. MCUV Filter
2. CPL Filter
3. ND4 Filter
4. ND8 Filter

Specifications

Brand

Sunnylife

Model

A3-F168

Compatibility

DJI AIR 3

Weight per Filter

4g
