Ref: 5905316148840

6 Adjustable Lens Filters Sunnlyfe for DJI AIR 3 A3-FI689 - MCUV+CPL+ND4+ND8+ND16+ND32

Sunnlyfe A3-FI689 6 pieces MCUV+CPL+ND4+ND8+ND16+ND32 adjustable lens filter for DJI AIR 3

Sunnlyfe filters guarantee accurate color reproduction while protecting your lens from scratches, moisture and greasy stains. They are an ideal choice for both hobbyists and professionals looking for excellent photo quality in a variety of conditions. The frames are made of lightweight aircraft-grade aluminum, giving them unparalleled durability.

CPL filter - enhance natural beauty

The CPL filter is an indispensable part of the kit, which allows you to effectively remove light reflections from non-metallic surfaces, intensify colors and highlight the charm of the sky, clouds and water. It is indispensable in situations such as shooting through glass, over water or underwater, creating unique effects in varied lighting.

ND/PL filters

ND/PL filters protect against overexposure, resulting in richer and more saturated colors. By shortening the exposure time, they allow you to capture crystal-sharp details, while lengthening the time allows you to create picturesque water images by reducing polarized light.

MCUV filter

The MCUV filter reduces the amount of incoming ultraviolet light, which improves the quality of transmitted light. In the mountains and highlands, it increases image depth and sharpness while protecting the lens from damage.

High quality

Sunnylife filters fit the DJI AIR 3 camera, made of aluminum and optical glass, weigh only 4 grams apiece and are compact for convenient use and easy transport. The kit also includes a stylish case with soft EVA foam padding to protect the filters while in transit.
