Ref: 6976037360292

Smart Light Switch WiFi Avatto TS02-EU-W2 2 Way TUYA (white)

Smart Light Switch WiFi Avatto TS02-EU-W2 2 Way TUYA (white)

The Avatto TS02-EU-W2 touch switch is perfect for your smart home. It allows you to conveniently switch the light on and off and, thanks to its compatibility with the TUYA / Smart Life app, allows you to control the lighting from a distance. You can also control the device with the voice assistants Amazon Alexa and Google Assistant. The switch is also distinguished by its water resistance and sleek, minimalist design. The product is equipped with 2 buttons and supports connection via Wi-Fi.

Remote control with the app

Not sure if you've turned off the lights before you leave the house? You don't have to wonder anymore - just reach for your phone! The switch is compatible with the TUYA / Smart Life app, so you can switch the lights on or off remotely from your smartphone. You also gain the ability to create timers and schedules for your appliances. Do you usually get up at 7 a.m. and go to bed at 11 p.m.? Set your lights to automatically turn on and off at these times.

Even more possibilities

The app offers many more possibilities. For example, you can link your devices together and control them in groups. It is also possible to pair switches with other appliances to create smart scenes. Use an additional motion sensor, for example, and make the lights automatically turn on when you enter the house! You can also share your devices with other family members so that they too can control

them via their smartphone.

Voice control

Do you have busy hands while cooking and could use some extra lighting? Or maybe you're lying in a comfortable bed and want to turn off the lights? No problem - the Avatto switch is compatible with the Google Assistant and Amazon Alexa smart assistants. So you can control it with voice commands! Now all it takes is a few words to quickly turn the lights on or off.

Enhanced design

The switch features a stylish, minimalist design - it will perfectly complement any décor. Thanks to its simple design, it is also very easy to clean - just wipe it clean of dust once in a while. It is also distinguished by its high durability and resistance to fading, scratching and other types of damage. In addition, the switch is waterproof, so you can install it in the bathroom without any worries. The device is also equipped with a backlight which can be switched on or off at any time.

Simple installation - pleasant operation

Mounting the device will not cause you any problems and will not take too long. You can also use two switches to control a single lamp, which is ideal, for example, on stairs. This way, you can easily switch on the light on the ground floor and switch it off when you go upstairs! What's more, the product's buttons are very pleasant to the touch and allow comfortable operation. Please note: A neutral wire is required for correct installation of the switch.
