

Hobbywing QuicRun Fusion SE 1800kV

Hobbywing QuicRun Fusion SE 1800kV

Ref: 6938994412216

Aesthetically attractive.

The Fusion SE is the result of passion and commitment to excellence in remote control car design. Every detail has been carefully considered to achieve a harmonious and modern vehicle silhouette. It is not only functionality that matters, but also aesthetics, which is why this model stands out from other vehicles. Sleek lines, aggressive LED headlights and sleek exterior details attract eyes both on and off the road.

FOC (Field-Oriented Control) - with a proven design heritage

FOC technology is revolutionizing the RC environment with superior efficiency and unparalleled performance. Combined with its design heritage, the Fusion SE gains not only unparalleled performance, but also reliability and durability. Long driving time while protecting the electronic system from overheating are advantages that both beginners and advanced racers are sure to appreciate.

Intelligent torque control

The Intelligent Torque Control system is a feature that sets the Fusion SE apart from the competition. Thanks to an advanced algorithm, the vehicle can adjust the engine's operation to different off-road conditions. As a result, the driver enjoys excellent control during steep hill climbs and controlled descents. Torque automatically adjusts to complex trails and ground, allowing for a smooth and precise ride.

Excellent control on hills

Driving on variable and challenging terrain places high demands on a remotely operated vehicle. That's why the Fusion SE is equipped with an advanced brake force control system. This gives racers full control over the vehicle's behavior on hills and descents. The ability to fine-tune braking allows you to smoothly tackle challenging trails and push the limits of your skills behind the wheel.

Durability for operation and weather protection

The designers of the Fusion SE have ensured the vehicle's robust construction, using the highest quality materials and components. As a result, the model is able to withstand even the most demanding conditions of use. Whether rallying in dust and mud or in the rain, the vehicle maintains its performance and reliability. The certified IP67 protection level ensures that the Fusion SE is waterproof, allowing you to have fun in any conditions, while protecting the electronics from dirt and damage." This is a vehicle you can rely on for long and intense rally sessions, enjoying the ride and the challenges of the terrain.

□ Diameter.

□ 36 mm

□ Length

□ 58.1 mm

□ Weight□

□ 201 g

□ Shaft diameter

□ 3.175 mm

□ Revolutions per minute/V

□ 1800

□ Application

□ Car, boat

□ Type

□ AC

□ Direct current

□ 40 A

□ Max. peak current

□ 160 A

□ Li-Po

□ 2 - 3

□ BEC voltage□

□ 6 - 7.4 V

□ BEC current (max.)

□ 4 A

□ Control□

□ Bidirectional

□ Programmable□

□ Yes
