Smart Plug ZigBee NEO NAS-WR07B TUYA 16A FR

Ref: 6924715900551

Smart Plug ZigBee NEO NAS-WR07B TUYA 16A FR

The NEO NAS-WR07B smart plug will be perfect for your smart home. It will allow you to remotely control your connected devices using the TUYA / Smart Life app, and is also compatible with Google Assistant, Amazon Alexa and SmartThings. Use timers, create complex scenes and save electricity with the power consumption monitoring function - the possibilities are truly vast! Note: a ZigBee gateway (sold separately) is required for proper operation of the outlet.

Remote control of devices

Not sure if you turned off the lights or turned off the TV before leaving the house? Now you can do it with the TUYA / Smart Life app - just a few clicks! The socket is compatible with most popular home appliances such as a refrigerator, lamp, microwave, washing machine, air conditioner or fan. This makes it great for many applications!

Even more possibilities with the app

Combine the outlet with other appliances or sensors and create smart scenes. For example, you can make the air conditioner run automatically when the temperature in the room exceeds a certain level, and the light in the hallway turn on when you get home from work. It is also possible to share devices in the app with other family members so that they too can operate them remotely. Nest also allows you to set the operating hours of selected appliances.

Wide compatibility

Do you use SmartThings on a daily basis? We have good news for you - the Nest is compatible with this platform, so you can conveniently operate your devices from a single app. Say goodbye to the need to switch between windows! The product also works with Amazon Alexa and Google Assistant voice assistants. Now all it takes is a simple command to turn on or off the equipment of your choice - you don't even have to move from your seat!

Refined in every detail

The socket was created from high-quality materials and features a modern, minimalist design - it will blend in perfectly with its surroundings. It has also been equipped with a special safety lock, so you can use it in places where children are present without fear. What's more, if there is a power outage, the product will remember the last settings and automatically resume operation when power is restored.

Pay lower electricity bills

Want to start saving electricity and pay lower bills? The NEO socket will help you do that! The product allows you to monitor energy consumption in real time. So you can check which equipment consumes the most electricity and at what times. Using the information obtained in this way, adjust the operation of your appliances so that they are on only when you really need them. Reduce your home's electricity consumption and save money!
