

Earbuds True Wireless Joyroom JR-BB1 (White)

Earbuds True Wireless Joyroom JR-BB1 (White)

Ref: 6956116772680

Joyroom JR-BB1 Wireless Headphones (White)

The headphones let you enjoy detail-rich sound thanks to dynamic drivers and composite diaphragms. In addition, they work for up to 35 h (including the charging case), and will take about 1.5 h to charge. Bluetooth version 5.3, on the other hand, provides a fast and stable connection to a compatible device. In addition, the headphones are lightweight, comfortable and will not fall out of your ears.

Bass-rich sound

Listen to your favorite tunes in even better quality with the Joyroom JR-BB1. The headphones use 10mm dynamic drivers and PU composite diaphragms. This translates into a richly detailed sound full of bass tones.

Up to 35 h of operation and fast charging

Listen to music almost without limits. The headphones are equipped with 35 mAh rechargeable batteries, allowing for about 7 h of playback. On the other hand, with the JR-BB1 charging case, they work for up to 35 h. In addition, 10 min of charging allows one hour of playback. To fully renew the energy of the headphones, you need about 1.5 h.

Fast connection and low latency

The headphones support Bluetooth version 5.3, which translates into a fast and stable connection. In addition, the Jieli AD6973D chip

affects lower power consumption. What's more, the low latency (65 ms) allows you to become even more immersed in the game. Better audio and video synchronization will also work well when watching movies.

- Manufacturer
- Joyroom
- Model
- JR-BB1
- Type
- In-ear
