Joyroom JR-EC07 wired in-ear headphones, Type-C (Silver)

The Joyroom JR-EC07 wired headphones are an excellent choice for those who value sound quality, wearing comfort and durability. They feature 10-millimeter neodymium drivers that deliver richly detailed sound. High-quality microphones reliably capture your voice, allowing you to talk freely. The remote control will make it easy for you to use, and the USB-C interface guarantees a stable connection to a compatible device.

Let yourself be amazed by the sound quality

Joyroom JR-EC07 will let you enjoy excellent sound quality, no matter what kind of music you're listening to - all thanks to the 10mm neodymium drivers. With a frequency response of 20 Hz-20 kHz, the headphones can reproduce both low and high tones for an amazing sound experience.

Made for conversations

Now you can comfortably talk to your loved ones almost anywhere. The headphones have a built-in high-quality microphone that ensures clear and crisp sound quality during conversations. It ensures that no matter where you are, your conversations will flow smoothly and without interruptions.

Easier to use

Conveniently control your music player without having to reach for your phone every time. The headphones have a remote control integrated into the cable, making it even easier to use. With it, you can turn up and down the sound, answer and end phone calls, change songs or activate the intelligent voice assistant.
