

Magnetic car holder Joyroom JR-ZS366

Magnetic car holder Joyroom JR-ZS366

Ref: 6941237111760

Joyroom JR-ZS366 magnetic car mount.

JR-ZS366 is a magnetic car mount that has adjustable legs - you can change the angle at which they are positioned to better fit a given surface. Thanks to the use of 20 N52 magnets, which guarantee and stability of your device while driving. To make your trip more comfortable you can adjust the holder to the most convenient angles - the range of side-to-side movement is 180 degrees, and you can also rotate the attached device by 360 degrees.

Versatility

Built-in adjustable legs are a feature that significantly increases the convenience of using the mount. You can freely change the angle of the legs, which allows you to optimally position the handle according to your individual preferences. This is especially important when the surface of the dashboard or other mounting location is not perfectly flat. Adjusting the legs eliminates the frustrating problem of an unstable grip, ensuring that your phone will be safe while driving.

Safety

The safety of your device is a priority, which is why the JR-ZS366 uses 20 powerful N52-class magnets. These magnets provide solid stability, keeping your phone securely in place even during turbulence while driving. With this technology, you can be sure that your smartphone will stay securely in place, even on rough roads.

Driving comfort

The JR-ZS366 is not only concerned with safety, but also with travel comfort. The mount allows you to adjust the 180-degree side-to-side angle, so you can find the most comfortable screen position. In addition, the full 360-degree rotation of the attached device gives you full freedom to rotate and adjust your view while traveling.
