

Car Headrest Tablet Holder Joyroom JR-ZS203

Car Headrest Tablet Holder Joyroom JR-ZS203

Ref: 6941237112026

Joyroom JR-ZS369 car tablet holder for headrest.

JR-ZS369 is a car mount for the headrest, thanks to which you can travel in peace and quiet. The holder allows you to mount devices between 4.7 and 12.9 inches - it will fit both a small phone and a large tablet. The mount attaches to the headrests of the front seats so that those sitting in the back can view content on their devices. The holder has a pivoting arm, which allows the person sitting in front to comfortably operate the device, such as changing an episode of a TV series or cartoon. The thickness of the folded holder is about 10 cm, so there is no fear of the person sitting in the back hitting it.

Great atmosphere

JR-ZS369 is designed to provide maximum comfort for all passengers in the car. Mounting the mount on the headrests of the front seats allows those sitting in the back to comfortably watch content on their devices. Whether adults or children are traveling, the holder allows you to create a pleasant atmosphere during long trips.

Swiveling arm

An important feature of the JR-ZS369 mount is the swiveling arm. It allows the person sitting in front to operate the device comfortably. This is especially useful when you need to change an episode of a TV series, stop on a map or adjust the content you are playing. Positioning the device within arm's reach allows you to use the screen freely while keeping your full concentration on the road.

Safety

Safety and convenience are key aspects that also come into focus in the holder's design. Its compact dimensions when folded, about 10 cm, eliminate the risk of collision for rear-seat passengers. This is especially important during sudden braking or other unexpected situations on the road.

Set contents

Car holder

□ Brand

□ Joyroom
