

Smart plug MEROSS MSS305-EU with energy monitor (Non-HomeKit)

Ref: 6973696566584

Smart plug MEROSS MSS305-EU with energy monitor (Non-HomeKit)

MEROSS MSS305-EU smart socket with energy metering (Non-HomeKit)

The MEROSS MSS305-EU Smart Nest allows you to conveniently control your connected devices wherever you are. It works with Amazon Alexa, Google Home and SmartThings, allowing you to control with simple voice commands. An energy monitoring function will help you cut costs, and with operating schedules and timers you can tailor the operation of your appliances to your needs. The Nest works with your existing Wi-Fi network, meaning you don't need an additional central device, and Bluetooth technology will make set-up a breeze.

Monitoring energy consumption

Want to be more aware of your home's energy consumption? The Meross Nest provides real-time reports on the energy consumption of connected devices. This is a great way to control costs and reduce your electricity bill. With access to historical data in the Meross app, you can track and analyse energy consumption trends at any time.

Just a few words

Operating the socket is easier than you think. With compatibility with smart voice assistants including Amazon Alexa, Google Home and SmartThings, you can conveniently control your devices with simple voice commands. Now you can turn off the lights or turn on the fan without having to get up from your chair.

Dedicated app

With the Meross app, you have full control over your devices wherever you are. Forgot to switch off the light when leaving the house? Not a problem anymore! With just a few clicks on your smartphone, you can turn off the lights, Hoover or any other appliance.

Tailored to your day

The app also allows you to set operating schedules and timers. You can programme appliances to turn on and off automatically at specific times of the day or night. This is great if you want lights to automatically turn on at dusk or off at a certain time.
