

Smart plug MEROSS MSS315MA-EU with energy monitor (Matter)

Ref: 6973696568830

Smart plug MEROSS MSS315MA-EU with energy monitor (Matter)

MEROSS MSS315MA-EU smart socket with energy metering (Matter)

The MEROSS MSS315MA-EU smart socket is the key to complete control of your home's energy consumption. The energy monitoring function provides current reports and consumption history, allowing you to reduce your electricity bills. With Matter support, both the configuration and operation of the socket is extremely easy. Advanced security guarantees the safety of your data, while multi-administrator support gives you more freedom to choose how you want to control your devices.

Monitor your energy consumption

Now you can be aware of how much energy your devices are using. The Meross socket provides real-time reports on how much energy your connected devices are using. With the Meross app, you will also gain unlimited access to historical data that will allow you to explore details and analyse trends in your home's energy consumption. What's more, the app also allows you to measure the energy generated - ideal for monitoring the energy from the solar panels on your balcony.

The future of the smart home

The Meross smart socket works on the basis of the latest Matter standard. It allows the socket to connect to various apps, control all your devices and even connect to a variety of cloud services, including Apple Home, Amazon Alexa, SmartThings and Google Home, among others. It's a solution that opens up new possibilities and gives you the flexibility to create an integrated ecosystem in your home.

Even easier set-up

Setting up your device won't be a hassle for you. Standard Matter makes the process even easier. Simply scan the QR code to launch the socket and enjoy all its features. No more wasting time on complicated configurations!

Included

smart socket

user manual

☐Manufacturer

☐Meross
