TWS QCY T18 Headphones

Enjoy fantastic sound quality when you listen to music, watch movies or play games. The TWS QCY T18 headphones support Snapdragon Sound technology and are equipped with 10mm dynamic drivers to deliver crystal clear sound. They have a runtime of up to 30 hours (with charging case). The aptX Voice codec and cVc 8.0 noise cancellation allow for convenient phone calls. A QCY app is also available for additional features and settings.

Stunning sound

Experience just how fantastic your favourite tunes can sound. The headphones are equipped with a state-of-the-art Qualcomm QCC3050 chip, and support Snapdragon Sound technology and the aptX Adaptive codec. They also have built-in 10mm drivers. All this makes them deliver high-quality, detail-rich, crystal-clear sound. Now you can feel like you're at a concert in your own room!

Touch control

Want to change the song you're playing or pause your music? You no longer have to search for your smartphone every time! The QCY T18 headphones are equipped with practical touch panels that allow you to quickly and conveniently pause or resume the playback, switch songs, handle incoming phone calls, activate Gaming Mode or activate the voice assistant.

Free communication

Now you can talk on the phone without any problems, even in extremely noisy environments such as a crowded bus or a shopping mall. The headphones feature high-performance microphones that reliably capture your voice. They also support the aptX Voice codec and cVc 8.0 noise-cancelling technology, which effectively filters out unnecessary background noise and gives you the confidence that your friends can hear you perfectly.

Bluetooth 5.2

Enjoy a fast, stable and reliable wireless connection, thanks to Bluetooth 5.2. You can also pair the T18 with two devices simultaneously and switch between them freely. For example, you can watch a movie on your tablet and then conveniently answer your phone. Just touch the headphone! There's also a special Gaming mode that guarantees even lower latency - the perfect synchronization of video and audio will allow you to increase immersion and break another record in your favorite game.

Lightweight, comfortable, stylish

The QCY T18 headphones have a distinctly sleek design. They are also incredibly light and comfortable. They fit perfectly in your ears, without falling out or exerting uncomfortable pressure. So you can listen to music without worry even for a long time. What's more, the set includes 3 pairs of interchangeable rubber bands in 3 sizes (S, M and L). This way you can adjust the headphones to your needs even better!

Long operating time

Don't worry that your headphones will run out of power too quickly. T18 are equipped with durable batteries, so they can play music for up to 7 hours on a full charge. The included charging case can extend this time to 30 hours. That's long enough to listen to about 450 songs, watch about 15 movies or view about 7200 short videos on YouTube.

The QCY app - for more possibilities

Want even more customization for your headphones? Try out the QCY app, which is available for free from Google Play and the App Store. For example, you can change the EQ settings, check the battery level and select Gaming mode. You can also customize the operation of the touch panels. For Android users, there is also a pop-up that makes pairing devices easier.
