Receiver Joyroom JR-CB7 Car-B (dark gray)

Add Bluetooth functionality to your home stereo system, speakers, or car radio with the Joyroom JR-CB7 receiver. The JR-CB7 supports reliable Bluetooth 5.3 connectivity and delivers excellent sound quality. Its plug-and-play feature makes installation a breeze, and the colorful LED ring makes it easy to use in the dark. You can also pair it with two devices simultaneously.

Perfect for Calls and More

This practical receiver is perfect for car trips, allowing you to comfortably listen to music with high-quality sound. It also features a Super Bass mode for enhanced bass - simply press the button to activate it. Moreover, the receiver allows for hands-free phone calls, equipped with a high-quality microphone that captures your voice exceptionally well. You can be confident that your conversation partners will hear you clearly! The large button, conveniently located, facilitates the handling of phone calls.

Reliable Connection

The receiver uses Bluetooth 5.3 technology, providing fast and stable connections up to 10 meters away with very low latency. This allows for seamless navigation, enjoying your favorite songs in the car, or making phone calls. You can also pair it with two devices simultaneously, allowing you to easily switch between phone calls and music playback.

Well-Crafted in Every Detail

Operating the device is exceptionally easy. Thanks to the plug-and-play system, you simply need to connect it, for example, to your car radio. The 3.5mm zinc alloy connector is highly durable and robust, and the TPE cable is known for its durability and resistance to damage. The included strap makes it easy to store. The receiver is also very compact and portable, taking up minimal space. Additionally, you can play music not only through Bluetooth but also from TF cards (up to 32GB).
