QCY H3 wireless headphones (blue)

The QCY H3 are wireless headphones that bring your favourite music to life! Hi-Res audio certification confirms excellent sound reproduction, guaranteeing you complete satisfaction with every note. Thanks to the 3 microphones with VDCNN algorithm, you can make phone calls even in noisy environments, and ANC technology lets you immerse yourself in your music by eliminating annoying noises. You can successfully connect them to 2 devices simultaneously. They have a runtime of up to 60 hours on a single charge and the ergonomic design ensures maximum comfort.

Top-quality sound

Get carried away by the music with the QCY H3! Equipped with dynamic 40 mm drivers, the headphones deliver sound of incredible quality. Clear treble, deep bass and an incredible wealth of detail will make your music sound better than ever. The QCY H3 are also Hi-Res Audio certified, meaning they deliver studio-quality sound.

Innovative technology

QCY headphones have been developed with different user needs in mind. Thanks to QCY's advanced adaptive technology, the H3 can adapt to the structure of your ear and the way you wear them. The headphones then create optimal noise cancellation and correct the sound curve, delivering sound tailored to your individual needs.

You decide what you hear

Focus on what matters most. The QCY H3 supports hybrid noise cancellation technology that effectively mutes ambient noise by 43 dB, allowing you to immerse yourself in the sounds of your favourite music. There are up to 4 ANC modes at your disposal, which vary in the degree of ambient noise cancellation. These include Wind Reduction mode, which is ideal for walking or cycling, and Transparency mode, which allows you to stay in touch with your surroundings without removing your headphones.

Talk without interruptions, wherever you are

Shopping in a crowded mall? Or waiting for your train at the train station? Now you can talk freely on the phone in any of these places! The QCY H3 headphones feature up to 3 built-in microphones, supported by an advanced VDCNN algorithm that automatically adjusts the noise cancellation level. This means your words will be accurately recorded, no matter what environment you're in.

Listen all day long

With the QCY H3, your favourite tracks will accompany you even for days! The headphones allow you to enjoy an exceptionally long operating time! With ANC mode on, they can play music for 35 hours, and with ANC mode off, their operating time increases to as much as 60 hours. After only about 2 hours of charging, I will be ready for use again!

Fast and reliable - Bluetooth 5.3 connection

Enjoy fantastic sound without lag, whether you're playing games, watching movies or listening to music. The headphones use the latest Bluetooth 5.3 chip, which guarantees a fast, stable connection with a range of 10m. What's more, in gaming mode, latency is reduced to just 0.068 seconds, resulting in perfect audio and video synchronisation.

Designed with your comfort in mind

Listen to music for hours without worrying about discomfort! The earcups made of high-quality synthetic protein leather fit perfectly to your ears without exerting unpleasant pressure. In addition, the built-in buttons will allow you to conveniently control your music player, calls or volume, making using the QCY H3 even more enjoyable.

Additional possibilities with the app

Discover all the features of your headphones with the QCY app! You will find it in both the Google Play shop and the App Store. The app allows you to customise the sound settings for any type of music, check the battery charge status, locate your headphones or choose from the available ANC modes.
