Audio Mixer & Sound Card AMC2 Neo

Ref: 6972237681847

Maono AMC2 Neo Audio Mixer and Sound Card

The Maono AMC2 Neo audio mixer with a sound card is a modern audio equipment with a range of features that will make your recordings sound exceptional. Here are some key features that distinguish this mixer:

Dual-Level Noise Reduction

The AMC2 Neo mixer is equipped with an advanced noise reduction system that captures even ultra-low sounds up to 60dB. This ensures that dynamic microphones sound exceptionally clear, eliminating unwanted interference.

48V Phantom Power

Power your microphones at 48V levels, providing them with sufficient power to achieve professional sound quality. This is the level commonly found in studio microphones, ensuring excellent sound quality.

Configurable Sound Pads

The mixer features three configurable sound pads that allow you to assign custom sounds. This is a great option for those who want to add character to their recordings.

SideChain and Music Only Function

With the SideChain function, the mixer automatically lowers the background music volume when the user starts speaking, ensuring clean and clear recordings. The Music Only function eliminates vocals in the accompaniment, leaving only the music, which is perfect for those who want to sing along with instrumental tracks.

Easy Operation

This mixer can be powered using a power bank, wall charger, or by connecting it to a laptop/computer. It also features separate microphone and accompaniment volume controls and a battery level indicator, giving you full control over your sound.
