

Lens filter Set CPL/ND8/ND16/ND32 Telesin for Insta360 GO3

Ref: 6974944461712

Lens filter Set CPL/ND8/ND16/ND32 Telesin for Insta360 GO3

Set of 4 CPL/ND8/ND16/ND32 Telesin filters for Insta360 GO3 camera

Create stunning shots regardless of the conditions. The Telesin IS-FLT-G03 set includes excellent quality ND and CPL filters designed for the Insta360 GO3 camera, with which you can take even more great photos and videos. Made of SCHOTT optical glass and coated with multilayer coatings - they stand out for their extraordinary resistance to damage and dirt. They are also extremely lightweight and easy to install.

High contrast and saturated colors with the CPL filter

The included CPL filter eliminates unnecessary glare and enhances contrast. It also allows you to increase the saturation of colors in the image. With its help, you will create stunningly detailed photos and videos that will attract attention with crisp, vivid colors.

Increased image dynamic range with ND filters

You'll also find ND 8/16/32 filters in the kit, which are ideal for taking shots with longer exposures. For example, they will be perfect for recording water or clouds flowing across the sky. With their help you can also capture not very busy roads in an interesting way. ND filters will make the image more dynamic.

High-quality optical glass

SCHOTT optical glass with uniform density is used for the filters, so light can reach the lens directly, avoiding pixel distortion. As a result, you can enjoy excellent quality, clear, crisp and richly detailed images with vivid, natural colors.

Resistant to damage and dirt

To improve light transmission and reduce reflections, both sides of the filter have been coated with a multi-layer nano-coating. It not only provides fantastic image quality, but also protects the glass from scratches and other damage. It also ensures that the product is waterproof and dustproof, making it easy to keep clean. If necessary, you can easily remove fingerprints or dust from the filter.

Extremely durable

Telesin brand filters surprise you with their incredible durability. The reinforced glass used in their production is characterized by a hardness of as much as 6H on the Mohs scale. This means that it is extremely resistant to scratches and other types of damage. You no longer have to worry that annoying scratches will quickly appear on your filters, which will spoil your dream shot.

Lightweight and durable

The outer frames of the filters are made of aircraft-grade aluminum, which stands out for its impressive strength and extreme lightness. It is also resistant to oxidation and corrosion. It ensures a longer product life and makes them able to serve you perfectly for many years.

Easy to install

Installing the filters is extremely easy and fast. All you need to do is place the accessory of your choice on the camera lens and then turn it clockwise. To remove them, simply twist them in the opposite direction. Mounting and removing the filters takes only a few moments - so if the need arises, you can quickly replace them and take a stunning shot!
