Cheerble M1 Interactive Cat Ball

Keep your cat entertained. The interactive Cheerble ball moves on its own when your cat touches it. It is equipped with special protection against falling into the cracks in the house. It has several modes of operation so you can adjust its action to the needs of your pet. You can charge it with a USB cable, and after about 60 minutes it will be ready to work again. The synthetic fiber finish is nice to the touch, and the LED backlight will further attract your cat's attention.

Easy to use

To prepare the ball for operation, hold down the power button for 3 seconds. Then select the mode: Passive, Normal, Active by holding down the power button again. The LED backlight will indicate the selected mode in green, blue or red. Touch or shake the ball to start the ball. Place the ball on the floor for your pet to play with.

Thought-out design

A carefully thought-out design is another advantage of the Cheerble ball. The toy works for 10 minutes and then turns off for 30 minutes, so your pet will not get bored so quickly. M1 is equipped with a special system that prevents the ball from falling into the gaps. In addition, its synthetic fiber finish is pleasant to the touch, and the LED backlight will attract your cat's attention and encourage it to be active.
