Ref: 6921002652100

Mcdodo CA-5210 USB-C to Lightning cable, 36W, 1.2m (black)

Mcdodo CA-5210 USB-C to Lightning Cable, 36W, 1.2m (black)
The USB-C to Lightning Mcdodo cable allows you to quickly charge your devices with its 36W PD. What's more, the digital display allows you to keep track of the battery level, and the refined design ensures damage resistance and durability.

Fast charging and data transfer
Don't wait indefinitely for your device to be ready for further use. The cable supports the PD 36W fast charging protocol, which translates into up to 4x faster charging for iPhones 8 (or newer). You can also use it to charge iPhones from other series, iPad and AirPods headphones. In addition, the product allows data transfer at 480 Mbps - you don't have to stop charging your equipment for the moment.

Refined design
The cable features a Mcdodo-developed MSD chip, which allows you to inform about the charging process in real time from the display. What's more, the use of aluminum alloy and nylon braid ensures resistance to damage, including bending or cracking. In turn, the copper cable guarantees smooth charging of devices.

Manufacturer
Mcdodo
