Ref: 6921002674911

Mcdodo CC-7491 car charger, 1x USB-C, 30W (black)

Mcdodo CC-7491 car charger, 1x USB-C, 30W (black)

Charge your gear quickly and conveniently while traveling in your car. The Mcdodo CC-7491 charger supports various fast charging protocols, so you'll renew your smartphone's power in no time. What's more, with voltage support in the range of 12-24 volts, it will fit a variety of vehicles. In addition, the carefully considered design ensures safe use.

#### Fast device charging

No longer do you have to wait too long for your device to be ready for further use. The charger supports such fast charging protocols as PD, QC, AFC, FCP, Apple 2.4, etc. As a result, you will charge your iPhone 8-14 series up to 60% in about 30 minutes. In addition, the product adjusts the output power to the connected device - you don't have to worry about damaging it.

#### Safety of use

Use the charger without worrying about damaging your equipment. Mcdodo CC-7491 has a built-in smart chip that automatically adjusts the amperage to the connected equipment. In addition, the product offers protection against overcurrent, short circuit, overcharging, overheating, etc.

#### Refined design

Bumpy road, sudden braking - the Mcdodo charger is prepared for it. CC-7491 is distinguished by its well-thought-out design, so it sits securely in the port and does not fall out of it. Moreover, the aluminum alloy finish is responsible for good heat dissipation and protects the charger from high temperatures.

#### Wide compatibility

The Mcdodo charger supports a voltage range of 12-24 volts, so you will use it in all kinds of vehicles. In addition, it is compatible with smartphones of popular brands - with its help you will charge iPhone 14 Pro Max, Samsung S22, Xiaomi 12, Huawei P60 and many others.
