Computer case Darkflash DF2100 + 4 ARGB fans (white)

Darkflash DF2100 Computer Case + 4 ARGB fans (white)

The Darkflash DF2100 is a stylish computer case featuring a transparent side panel made of tempered glass, allowing the user to admire internal components such as the included glowing ARGB fans. A thoughtful layout of holes and mounts allows the user to plan the space inside in various ways to best suit their needs. The spacious interior can accommodate up to 11 fans, while the stylish front panel with double mesh and ventilation holes ensures excellent air circulation. Horizontal installation of the graphics card prevents it from bending when it's too long.

Horizontal position of VGA/graphics card

The Darkflash DF2100 case ensures the safety and efficiency of the user's equipment. Horizontal graphics card installation not only optimizes the internal appearance but above all prevents it from bending, especially when it's too long. This protects the equipment and keeps it intact.

Spaciousness and configuration flexibility

In the Darkflash DF2100, space is key. The large main chamber can hold up to 11 fans, allowing the user to create the ideal cooling setup for their system. The case interior has been designed for easy organization, tailored to individual needs.

Cooling - maximum efficiency

Cooling in the DF2100 case is well-thought-out. The ability to install cooling up to 260mm on the top and front panels (noting that fans on the right and front cannot be installed simultaneously) ensures excellent heat dissipation, guaranteeing long and stable component operation.

Fast USB3.0

In today's world, fast ports are key to effective work. The USB3.0 port of the Darkflash DF2100 case offers users not only lightning-fast data transfer speeds but also efficient device charging. This makes work, entertainment, or backup faster and easier for them.

Elegance combined with functionality

The design of the DF2100 case combines aesthetics and functionality that every user will surely appreciate. The elegant front panel made of ABS and the transparent side panel of tempered glass not only emphasize the unique character of the set but also promote excellent heat dissipation. It guarantees that the user's equipment will not only look great but will operate efficiently and without failures.

The set includes

Case

M/B / SSD screw x 21

VGA/PSU screw x 6

Copper standoff x 1

Hexagonal M/B screw x 3 (6 pre-installed)
