Computer case Darkflash DLM4000 (white)

Ref: 4710343797807

### Darkflash DLM4000 Computer Case (White)

The DLM4000 is a minimalist computer case with a transparent side and rear panel made of tempered glass, which allows for a view inside the computer. This is especially satisfying with components equipped with RGB lighting. The side panel is mounted without screws, making it easy to quickly disassemble. Due to the fact that a large part of the case surface has numerous holes, heat dissipation is more efficient, and the internal components don't overheat. The air intake on the side has a magnetic filter that catches dust and prevents it from entering the computer. The DLM4000 can accommodate up to 8 fans of 120mm in size.

### Case Design

Thanks to the use of tempered glass, the front and side panels of the DLM4000 are transparent. Most of the top panel surface of the case has larger and smaller ventilation holes. It also features a power button, two audio ports, two Type A ports, and a Type C port, which allows for data transfer at a speed of 10Gbit/s. The bottom of the case has holes across its entire surface, preventing dust accumulation inside and enhancing heat dissipation capabilities. The rear wall also has holes and cutouts for mounting internal components.
