

Steel Measuring Tape 5m/19mm Deli Tools EDL9005Y (yellow)

Ref: 6973107486982

Steel Measuring Tape 5m/19mm Deli Tools EDL9005Y (yellow)

Coiled measure 5m/19mm

A practical 5m long coiled tape measure in yellow. This is a universal instrument for home and professional use. Using it, you will easily measure walls or floors. Independent work will be facilitated by an automatic lock. A similar measuring tape will come in handy on every construction site and during most renovations. It will work well both for larger projects and, for example, when refreshing a small room. Taking accurate measurements is extremely important for any such project.

Practical and durable

The tape measure is made of rigid material, so it does not tangle and holds straight. This makes it indispensable in the case of flat and straight surfaces on the construction site. Deli's product is equipped with an ergonomic housing, which is distinguished by its shock resistance. On the other hand, there is a special measuring clip on the tape, which allows precise internal and external measurement.
