

## Wireless gaming headphones Blitzwolf AA-ER6, Bluetooth 5.2,

Wireless gaming headphones Blitzwolf AA-ER6, Bluetooth 5.2, RGB, microphone

Ref: 5907489609531

### Blitzwolf AA-ER6 wireless gaming headphones

Take your gameplay to a new level. The Blitzwolf AA-ER6 headphones are equipped with dynamic 40mm drivers, so they can deliver great sound quality whether you're playing games or listening to music. They also have a detachable microphone and colorful RGB backlighting. They let you play music in 3 ways - from a TF card, from a device connected via an AUX cable and via Bluetooth 5.2.

### Fantastic sound

Accept the invitation to a real musical feast. The AA-ER6 headphones have built-in dynamic 40-millimeter drivers that deliver a wide sound field, powerful, deep bass and an impressive wealth of detail. So you can rediscover your favorite songs or provide an even more immersive gaming experience. Don't be surprised and break another record!

### As many as 3 ways to connect

You can connect to the headphones in 3 ways. For example, it is possible to connect the device of your choice to them via an AUX cable. The AA-ER6 also allows you to play music from a TF card - just upload your favorite songs to it. Do you care about the greatest possible freedom of movement? Connect to your headphones wirelessly! Bluetooth 5.2 will let you enjoy stable transmission, fast pairing and low latency.

### Colorful backlighting

The headphones are also equipped with colorful RGB backlighting, which gives them a modern, gaming look. This makes them a perfect match for your gaming gear! There are also several interesting effects at your disposal - try them all and find the perfect setting for you!

### Ergonomic design

Forget about discomfort or ear pain - even during prolonged gameplay. The headphones are distinguished by a well-thought-out ergonomic design and fit perfectly on your ears, while not pressing them. What's more, the AA-ER6 earcups are covered with a skin-friendly yet durable material. Don't be afraid of damaging them! Also noteworthy is the foldable design of the headphones, which makes them much easier to store and transport.

### Long working time

Now you can use the headphones even for a whole day without any problems. The AA-ER6 is equipped with a 400mAh rechargeable battery, which provides up to 45 hours of operating time on a single charge. In standby mode, the product will last for up to 400 hours! In addition, to charge the headphones, about 2.5 hours are enough.

### Detachable microphone

If you often play online games, you certainly know how important it can be to communicate effectively with other players. The AA-ER6 headphones are equipped with a high-quality microphone that will perfectly record your voice. Now you can easily contact other team members and warn them of danger! What's more, if you don't need the microphone for a while, you can simply detach it.
