Teclast T50Pro Gray Tablet 11"

Teclast T50Pro is a tablet that effortlessly combines modern technology with a unique design. Its 11-inch screen, MediaTek Helio G99 octa-core processor, and advanced Mali-G72 MP3 800MHz graphics card make it an ideal device for demanding users. Additionally, its 8GB RAM and expandable internal memory up to 1TB ensure smooth operation and ample data space.

11-inch Full HD Display

The Teclast T50Pro features an impressive, 11-inch IPS TDDI fully laminated display, offering a resolution of 2000 x 1200 pixels. Its 120Hz refresh rate ensures fluid image motion, which is crucial when watching movies or playing games. The small, 8mm wide bezels add elegance and increase workspace.

Processor and Graphics Card Performance

The heart of the Teclast T50Pro is an octa-core MediaTek Helio G99 processor, supported by a Mali-G72 MP3 800MHz graphics card. This configuration provides high performance necessary for gaming or working with photo editing apps, video, and more. The Helio G99, produced with a 6nm technological process, combines two powerful A76 cores clocked at 2.2 GHz and six efficient A55 cores, achieving a score of 400,000 in the AnTuTu benchmark.

Android 13: Customization, Security, and Fluidity

Android 13, installed on the Teclast T50Pro, is a gateway to a world of almost unlimited customization possibilities and enhanced security. Users can customize apps and the media player to their liking, changing colors, themes, and language. Android 13 also places a

special emphasis on privacy and security, increasing control over apps and protecting photos, videos, and clipboard content. This includes parental control. Thanks to the updated taskbar and improved split-screen functionality, multitasking becomes more intuitive and fluid.

Expanded Memory and Data Storage

The device offers 8GB RAM, which significantly impacts the speed of the system and apps. It's possible to expand it by an additional 8GB. Moreover, 256GB of internal UFS 2.2 memory, expandable to 1TB with a Micro SD card, provides ample space for files and data.

Audio and Video

The Teclast T50Pro is equipped with four speakers featuring the fourth-generation SWEET system, delivering immersive 3W audio experiences. In addition, the tablet has an 8MP front camera and a Sony 20MP rear camera with autofocus and an additional AI camera for scene recognition, making it excellent in various conditions. The device also has an eye protection mode, a keyboard-adapted mode, a reading mode, and a screen split mode, making it suitable for both entertainment and work.

Connectivity and Navigation

The Teclast T50Pro supports 4G LTE, AC standard WiFi, Bluetooth 5.2, offering fast and stable internet connection. The tablet supports four positioning systems: Beidou, GPS, GLONASS, and GALILEO, ensuring precise navigation. It also supports TDD+FDD 4G networks in two modes, faster and more compatible dual-band WiFi AC access, and VoLTE, which allows simultaneous talking and fast internet connection. Moreover, Networking Engine 2.0 technology reduces network response latency, and Bluetooth 5.2 provides high-quality audio. The data download speed is up to 600Mbps, and the upload speed is up to 150Mbps.

Elegance in Simple Form

The tablet is characterized by a simple, minimalist design with straight sides rounded at the corners. Cameras and the LED are symmetrically placed in the upper left corner. The black bezels surrounding the screen are only 8mm, allowing for comfortable work and immersion during play.
