Vibrating Massager KiCA Mini 2 for Muscles (Black)

Discover a new dimension of relaxation with the KiCA Mini 2 massager, which combines elegance and functionality. Its compact design makes it easy to use and transport - you can comfortably take it on your travels to enjoy muscle recovery wherever you are. The device provides vibrations with a frequency of up to 3000 rpm, allowing for deep massages and offers various operating modes, including a special Physical Therapy mode. Battery indicators inform you of the battery status, which can provide up to 4.5 hours of operation, and the USB-C port makes charging easy. Intelligent safety features ensure safe usage. Various massage heads are included in the package.

Deep Massage for Every Muscle

With KiCA, you'll experience an intense massage that reaches deep layers of muscle tissue. Thanks to vibration strength of up to 3000 rpm, the device effectively relaxes tense muscles, supports recovery, and provides relief. In Physical Therapy mode, Mini 2 provides a circulatory massage with automatic speed changes. A 6mm range of motion combined with a pressure force of up to 3.2 Kgf ensures exceptional effectiveness, which will be appreciated by athletes, physically active individuals, and those dealing with muscle discomfort.

Various Intensity Levels

The ability to adjust the speed allows you to tailor the device's performance to your current needs. You can choose from 4 intensity levels and 4 silicone massage heads included in the package (flat, conical, U-shaped, and spherical), each suitable for different muscle groups.

Safety Solutions

The KiCA Mini 2 massager offers several safety measures to prevent muscle injuries that can result from excessively long massages. After 10 minutes of continuous operation, the device automatically enters standby mode. To resume the massage, press the dedicated button within 5 minutes - this will also restore the previously used settings and restart the countdown. If you don't resume the massager's operation after 5 minutes, it will automatically shut off.

Reliable Performance

To ensure smooth and efficient operation, the KiCA massager is equipped with motor blockage protection. If the rotating mechanism is blocked for 10 seconds, the device will automatically enter standby mode to prevent damage. In such a case, you can also resume Mini 2's operation by pressing the appropriate button within 5 minutes. If you don't do this, it will automatically shut off.

Intuitive Operation and Convenience

The practical On/Off button allows for easy turning the device on or off. You can also use it to pause and resume the massage. Furthermore, the massager's weight does not exceed 195 g, and its dimensions are only 79 x 33 x 116.5 mm. As a result, Mini 2 is the size of a phone, allowing you to massage your body comfortably without straining your wrist.

Long Operating Time

The 1100 mAh battery eliminates the need for frequent charging of the massager. If the device operates at a speed of 2000 rpm using a flat massage head, you can enjoy its reliable performance for up to 4.5 hours. At higher rotation frequencies, the time is reduced to about 3 hours. Battery status indicators will keep you informed. The included USB-C cable allows for convenient charging of Mini 2 in about 2 hours.

Modern Design

The KiCA Mini 2 massager is made of aerospace aluminum, ensuring durability accompanied by an elegant, classic design. The well-thought-out T-shaped construction further enhances usability.

Included in the Package:

Vibrating Massager KiCA Mini 2 with flat massage head

Conical massage head

U-shaped massage head

Spherical massage head

USB-C charging cable
