

## Flashlight Superfire A2, 650lm, USB

Flashlight Superfire A2, 650lm, USB

Ref: 6956362901162

### Mini torch with zoom

The Superfire A2 is a compact torch, using the high quality SST-40-W LED. It will fit into a pocket, backpack, handbag or even a sachet and, thanks to its splash resistance, it will perform in all conditions and unforeseen situations. The torch is made of high-strength aerospace aluminium, characterised by high resistance to damage and wear.

### Quick micro USB charging

The torch is powered by a single 18650 rechargeable battery (included). The battery can be charged very quickly via the micro USB port, so that the battery does not need to be removed from the torch. When using the torch, the status of the battery charge is indicated on the LED backlight: green indicates that the battery charge level is sufficient; red indicates that the battery needs to be recharged.

### High power

The torch shines with a brightness of 650 lumens at 10 watts, provides a strong light and has a long life, so you don't have to worry about frequently replacing the LED. The torch has 5 light modes. 3 modes are used to control the brightness (strong, medium, weak) and the other two are used to activate the strobe light or SOS. The torch switch is used to switch between modes.

### Additional features

The Superfire A2 torch has the ability to focus the beam by extending the torch head, so you will see the illuminated area very accurately. The intelligent battery will let you know when the battery is running low and will also cut power if the battery voltage is too low, preventing damage to the battery. The splash resistance allows you to use the torch in all conditions.

#### Kit contents

Torch

18650 rechargeable battery

USB cable

☐ Producer

☐ Superfire

☐ Model

☐ A2

☐ Light source

☐ SST-40-W

☐ Rated power

☐ 10W

☐ Operating time

☐ 2 hours

☐ Number of lumens

☐ 650

☐ Drop resistance

☐ up to 1m

☐ Dimensions

☐ 125 x 28 x 26 mm

☐ Weight

☐ 85g

☐ Waterproof

☐ IP34

☐ Illumination range

☐ 200 m

☐ Battery capacity

☐ 2000mAh

☐ Modes

☐ strong - medium - weak - stroboscopic - SOS

☐ Material

☐ aircraft-grade aluminium 6061-T6

☐ Charging time

☐ 3 hours
