Deerma CM800

Deerma CM800 vacuum cleaner is a fast and effective way to get rid of unwanted dirt or dust mites from your environment. The device innovatively combines high temperature, ultraviolet light, high suction power and high frequency vibration to ensure effective removal of allergens. A strong vibration element, a powerful motor and a control module are responsible for the product's high efficiency.

Ultraviolet power

The hoover uses violet light 253.7 nm long, which is effective in getting rid of both adults and mite eggs. The effectiveness of this method is 99.9%! Additionally, the ultraviolet lamp has viral and bactericidal properties which makes it ideal for use by allergy sufferers and leaves the mattress exceptionally fresh and hygienic.

High temperature

The air with a temperature of 50 degrees Celsius is lethal to mites and can penetrate deep into the mattress to eliminate unwanted specimens even more effectively.

Suction power

The high suction power of 13000 Pa and vibrations of 8000 beats per minute allow the mattress to be thoroughly cleaned without leaving

any contaminated areas.

Filtration

In addition, the Hoover is equipped with a HEPA filter and a double filtering layer so that when cleaning the mattress it simultaneously cleans the air around the device.

Practical solutions

The casing is made of high quality materials which guarantee a long life of the Hoover and the comfortable handle ensures high comfort and speed of use. The dust container is easy to clean, after emptying it is enough to wash it under running water.

Safe use

A special protection ensures that the lamp only activates on contact with a flat surface, thus providing UV protection and eye protection. There are special ventilation grilles in the casing, which ensure that the device maintains the right temperature without overheating.

Brand

Deerma

Model

CM800

Suction power

>13kPa

Rated voltage

220-240V~50-60Hz

Rated power

450W
