Bebird T15 Ear Cleaning Camera (White)

The Bebird T15 Ear Cleaning Camera provides a clear view of the inner ear with its 5-megapixel HD camera equipped with a CMOS 1080P sensor. It features a 6-axis gyroscope for image stability. An advanced WiFi chip allows fast data transmission to the app, and a high-capacity 300mAh battery ensures up to 85 minutes of operation. The product is water and dust resistant, ensuring user comfort while maintaining high hygiene standards. The package includes various accessories, including a stainless steel scoop for skin blemish removal.

High-Quality Imaging

The 5MP HD endoscopic camera, along with an optical lens and advanced CMOS 1080P sensor, allows safe exploration of the inner ear. An advanced 6-axis gyroscope ensures image stability, providing a smooth and safe ear cleaning process.

Reliable Connection

The modern WiFi chip ensures a reliable connection with minimal latency up to 5 meters away. A 50% screen optimization compared to standard solutions enhances user comfort. As a result, you can observe real-time images captured by the otoscope camera through the dedicated Bebird app, available on the App Store and Google Play.

Comfort and Safety Solutions

The main body of the Bebird device maintains a temperature below 32°C, while the otoscope's tip reaches a maximum of 25°C. This ensures user comfort and safety during use. The built-in HALL switch with green light indication signals device activation. Moreover, the T15 boasts an elegant appearance with its pearl paint finish and a sandblasted casing to prevent fingerprint smudges. The product is also water and dust resistant.

Practical Accessories Included

The specially designed ear tip is easy to install, featuring a screw structure to prevent accidental detachment, ensuring safety during use. The package also includes items such as a storage tube, various ear tips, and a stainless steel scoop for blemish removal.

Long Operating Time

The Bebird T15 otoscope is equipped with a 300mAh battery that can operate for up to 85 minutes on a single charge. The USB-C charging port takes approximately 85 minutes to recharge the device.
