Thunderrobot Wireless Gaming Mouse ML701 (black)

h3>Thunderrobot ML701 Wireless Gaming Mouse (Black)

Thunderrobot ML701 is a wireless gaming mouse that offers 5 DPI levels, allowing you to tailor its responsiveness to your needs, making victories even easier! Each DPI level is associated with a color, so just by looking at the mouse, you can tell its settings. Moreover, the mouse comes with a battery charge indicator that displays its status in real time, ensuring you always know when it's time to charge. To recharge, use the provided USB-C cable. Once charged, enjoy not only flawless mouse performance but also various color modes.

Battery and DPI Excellence

The ML701 has a battery charge indicator located at the convergence of the left and right buttons. This ensures you always know when to charge. The mouse gives you the flexibility to adjust the DPI according to your preferences. Available levels are 800, 1600, 2400, 3200, 4000, represented by yellow, navy, sky blue, green, and pink respectively, so you can know the settings just by its appearance.

Ergonomics

The design of ML701 features an ergonomic build, ensuring your hand rests comfortably. This ensures that even with extended use, you won't feel discomfort.

Function Keys and Other Features

The mouse comes with 5 function keys - two of which can be assigned custom functions. The ML701 is a mouse that automatically goes

into sleep mode after a minute of inactivity.
