Wireless Controller / Gamepad Thunderrobot G35 (White)

The Thunderrobot G35 controller is a versatile device tailored to the needs of every user. Its compatibility with multiple platforms and consoles makes it an indispensable tool for gamers using various systems. Effortlessly switch between wired and wireless modes, programmable macro key, and special game modes like TURBO burst cater to individual preferences and gameplay style. Furthermore, quick connection recovery and ergonomic design with specially textured joysticks and an intuitive button layout guarantee comfort and precision in every situation. Another advantage is the long battery life and dual vibration motor. In short, the Thunderrobot G35 combines modernity, functionality, and convenience, making it an excellent choice for any gamer.

Compatibility with multiple platforms and consoles

The Thunderrobot G35 controller stands out for its versatility. Its compatibility with various platforms and consoles makes it the ideal choice for users who want to use a single controller on different devices. Whether the user is playing on a console, computer, or another device, the G35 will accompany them without any problems.

Seamless switching between wired and wireless mode

Users who prioritize freedom of movement can choose wireless mode and enjoy freedom during gameplay. However, if they prefer a stable connection, they can easily switch to wired mode. It's a perfect solution for those who want to tailor the controller to their

preferences.

Programmable macro key

The Thunderobot G35 controller offers a programmable macro key feature. This allows players to customize buttons to their individual needs, giving them an advantage in competitive games. It's a tool that will undoubtedly benefit both beginners and advanced players.

Special modes for gamers: TURBO burst, automatic and manual mode

The G35 offers a TURBO burst mode, which allows, with a single press, to perform a series of actions, e.g., fire several times. Additionally, thanks to the automatic and manual modes, the controller adjusts to your gameplay style, allowing even more control over the game.

Quick connection and wake-up with one button

Nothing is worse than losing connection at a crucial game moment. Thunderobot G35 solves this problem by offering a quick connection recovery with a single button and a fast SWITCH wake-up function.
