Wireless Earphones TWS QCY HT07 ANC (white)

Looking for comfortable headphones that meet your needs? How about the QCY HT07? This wireless model provides long battery life, excellent audio quality, and exceptional call clarity. Equipped with ENC noise-canceling microphones and 4 ANC noise reduction modes, it lets you cut off from the outside world. Its low latency level will also please gamers! Check out what else they have to offer!

Fantastic Sound

The high audio quality is thanks to 10mm dynamic biofilm drivers. They ensure precise sound reproduction and perfectly balanced low, mid, and high tones. Moreover, the HT07s are great for listening to podcasts, audiobooks, or for phone calls — the vocal sound is clear, distinct, and detailed.

4 Noise Reduction Modes

The HT07 headphones adapt to you! ANC noise reduction lets you disconnect from the outside world and focus solely on your music or podcasts! You have 4 tailored modes at your disposal. Indoor mode effectively eliminates noises like conversations, loud TVs, etc. Commuting and Outdoor modes make you forget you are on a noisy station or busy street. Anti-wind mode minimizes annoying wind noises, e.g., while running.

Reliable Bluetooth Connection

Bluetooth version 5.2 ensures wireless functionality. It guarantees stable, interference-free transmission up to 10 meters away! The latency level is only 0.08 seconds, which means you'll enjoy perfect sound-image synchronization! Play dynamic games and beat your records!

Speak Freely

The HT07 model uses an intelligent algorithm to ensure your phone calls are uninterrupted! The headphones are equipped with 6 ENC noise-canceling microphones that precisely capture your voice while effectively reducing outside sounds. Do you broadcast online? Or often talk on the phone? Your interlocutors will always clearly hear everything you have to say!

Workout to Your Favorite Beats

The headphones keep up even with the most active users! Their IPX8 rating means they are not afraid of sweat drops or rain, so you can confidently take them to your toughest workouts. Don't give up running even in the rain? Great! The headphones can accompany you even then!

Long Battery Life

Can't imagine a trip without music? Neither can we! That's why the headphones are equipped with an efficient battery that allows for up to 32 hours of wireless operation! Depending on the selected mode, you can use them for about 4 hours of phone calls or about 7-8 hours of listening to your favorite tracks. The charging case allows you to recharge the headphones 3 times.

More Possibilities with the App

Using the QCY app, you can personalize the operation of your headphones. What are the possibilities? From its level, you can adjust EQ values, sound balance, and also set the operation of the touch panel according to your preferences. The app is compatible with Android and iOS systems, offering wide compatibility.

Complete Comfort of Use

That's not all of the advantages! A single earbud weighs only 4.4 g, so even prolonged use won't cause discomfort. Moreover, the acoustic openings are connected to provide air pressure balance. What does this mean? Exceptional comfort and fantastic sound!

Included in the Set

- Headphones
- Charging case
- Cable
- Manual
