

Smart Bluetooth Thermostat Valve Gosund STR1

Smart Bluetooth Thermostat Valve Gosund STR1

Ref: 6972391287657

Smart Bluetooth Thermostat Valve Gosund STR1

Ensure optimal temperature in your chosen room and save on bills. The Gosund STR1 smart thermostatic head can help with this, allowing you to set timers and choose from several operating modes. It can also detect open windows - in such a situation, it will turn off the heating, helping you avoid higher charges. The device supports Bluetooth connectivity, and its convenient control is possible through a dedicated app. It is also compatible with Tuya.

Voice Control

If you don't have your phone at hand but want to increase or decrease the heating, no problem - the Gosund STR1 head is compatible with smart assistants like Google Assistant and Amazon Alexa. You can control it with simple voice commands! Now, a few words are enough to adjust the room temperature to your needs.

Well-Thought-Out Design

The head is equipped with a clear display that allows you to conveniently check essential information, such as the current temperature. The device is also straightforward to use. Moreover, thanks to the included adapters, you can easily mount it on various types of radiators - no compatibility issues to worry about!

Create Schedules and Save on Bills

The dedicated Gosund app allows you to create schedules for the thermostatic head. This way, you can, for example, set higher room temperatures in the morning and evening when you're at home. During the day, while you're at work, you can set a lower temperature to save energy.

Convenient Control with Multiple Heads

Want to conveniently control the temperature in all rooms of your home? Get more thermostatic heads and the separately available Bluetooth gateway, which allows you to control up to 50 devices simultaneously! This way, you can easily ensure comfortable conditions throughout your apartment.

Additional Features

The head is equipped with frost protection and a special lock that allows for safe use in places where children are present. But that's not all - if the device detects an open window in the room, it can automatically turn off the heating. This way, you can avoid additional charges! There is also a special Holiday mode that allows for automatic maintenance of a specified temperature when you are away from home for an extended period. You can save energy and reduce unnecessary expenses!

Long Battery Life

Two AA batteries are sufficient to power the thermostatic head. You don't have to replace them too often - thanks to low energy consumption, the STR1 model provides a runtime of up to 1.5 years! With Gosund, you can save money and time.
