

## Gaming Controller GameSir X2 Pro White USB-C with Smartphone

Ref: 6936685220508

Gaming Controller GameSir X2 Pro White USB-C with Smartphone Holder

### GameSir X2 Pro Black Wireless Controller with Phone Holder

The GameSir X2 Pro Black Wireless Controller is a modern solution for mobile gaming enthusiasts. It features a direct USB-C connection, zero input lag, and the ability to charge your phone while gaming. With the GameSir App, this controller allows button mapping and compatibility with apps that don't natively support controllers. Its durability, build quality, and additional accessories make it an excellent choice for any gamer.

#### Direct USB-C Connection

The GameSir X2 Pro controller offers a direct connection to your phone via the USB-C port. This feature not only ensures a fast and stable connection but also eliminates any input lag, which is crucial for gaming. This solution provides a smooth and responsive gaming experience, greatly enhancing user comfort.

#### Pass-Through Charging

One of the unique features of this controller is pass-through charging. This allows you to charge your phone while gaming, which is incredibly practical and enables long gaming sessions without worrying about battery depletion. This feature is especially beneficial for gamers who spend hours playing their favorite games.

#### Customization with GameSir App

The GameSir App opens up new customization possibilities. Users can map buttons according to their preferences, which is particularly useful in games that require quick and precise reactions. The app also enables the controller to work with apps that don't typically support controllers, significantly expanding the range of compatible games.

#### High Quality and Durability

The GameSir X2 Pro controller is equipped with Kailh micro-switches, guaranteeing a lifespan of up to 3 million clicks, and analog triggers with Hall Effect Magnetic Sensors. Its build not only ensures durability but also precision, which is essential for demanding gamers.

#### Comfort and Ergonomics

The controller weighs only 179g and its dimensions provide comfortable grip and manipulation during gameplay. Additionally, thumbstick covers are included, which can be customized to individual needs, enhancing user comfort.
