

Transmitter / Receiver BlitzWolf BW-BL2, Bluetooth 5.0

Transmitter / Receiver BlitzWolf BW-BL2, Bluetooth 5.0

Ref: 5907489605182

Blitzwolf BW-BL2 Bluetooth transmitter/receiver

The compact Bluetooth 5.0 transmitter/receiver BW-BL2 weighs only 18g and stands out for its wide compatibility. It guarantees reliable transmission and can operate in 2 modes - TX or RX. The BW-BL2 is also characterized by long time operation, thanks to the built-in rechargeable battery of 200 mAh. This functional device will prove useful in many different applications.

Pocket size

The BW-BL2 can accompany you almost anywhere. Its light weight and dimensions of 44x44x12mm make it fit in your backpack, purse or even pocket without the slightest problem. It will also not take up too much space in your home - you can successfully place it anywhere you need it.

Bluetooth 5.0 - fantastic connection quality

What makes you enjoy reliable, fast and stable transmission in almost every situation? High-end Bluetooth 5.0 connectivity! BW-BL2 supports A2DP transmission and reception protocols, transmitting the signal without delay, stuttering or other problems. It also provides excellent HD sound quality and reduced power consumption.

Apply it 2 ways

The device will work perfectly as both a transmitter and a receiver. In TX mode, you can, for example, transmit sound from your TV to your wireless Bluetooth headphones. In RX mode you can play songs from your phone on the additional amplifier. Check out what else you can get!

Wide compatibility

No matter what equipment you use every day - the BW-BL2 is sure to be compatible with at least a few of them. For example, you can easily connect it to your TV, laptop, smartphone or tablet. You can also pair it with headphones or a speaker. The possibilities are truly enormous!

Long runtime

The transmitter/receiver is equipped with a durable rechargeable battery that provides an impressively long run time. The BW-BL2 can operate for up to 5 hours in TX mode or up to 7 hours in RX mode. It only takes 2 hours to recharge the device. Such high performance will undoubtedly meet your expectations.
