Mechanical keyboard Royal Kludge RK98 RGB, Red switch (blue)

Ref: 6935280818486

Royal Kludge RK98 RGB mechanical keyboard, Red switch (blue)

Featuring RK Red linear switches, the Royal Kludge RK98 RGB mechanical keyboard delivers faster response times than traditional keyboards. It is the ideal choice for demanding gamers for whom precision is key and every moment matters. With 98 keys, this keyboard adapts to the diverse preferences of users who need to have multiple functions at their fingertips. Whether you're a beginner gamer or use it in the office, the RK98 with RK Red switches will provide comfort and accuracy.

Freedom without wires

The RK98 keyboard offers three modes of operation: wired, Bluetooth and 2.4G. This allows you to switch seamlessly between three Bluetooth-connected devices. Interchangeable keys and the option to detach the USB cable add to the user experience. Two USB-A and USB-C ports allow simultaneous battery charging and data transfer. It supports three devices simultaneously via Bluetooth technology, allowing you to switch seamlessly between them. Simply press FN + Q/W/E to move from one device to another in a flash.

Personalisation at your fingertips

Thanks to Royal Kludge software, the RK98 gives you a choice of 14 backlighting modes and up to 16.8* (16.77) million RGB colours. You have control over the assignment of functions to the keys, customising them according to your needs. The flexibility of this model also manifests itself in the ability to remove the frame around the keyboard, allowing you to customise the look to suit your own style. For

your comfort, the keyboard has two height levels - it has extra feet with rubber anti-slip pads.

Easy switch replacement

With the Royal Kludge RK837 keyboard, you can comfortably replace the switches without the need for soldering or complicated tools. With the help of the included tweezers, you can swap switches to make the keyboard suit your needs.

Versatile in operation

With compatibility with various operating systems such as Windows, iOS, Android and Linux, the RK98 keyboard becomes a versatile tool that supports both desktop and mobile devices. The Royal Kludge RK98 RGB is a keyboard that helps you achieve higher performance both when gaming and working. It is a tool that strikes a balance between speed, precision and flexibility without over-emphasising its advantages.

Ergonomic design

The keys in the centre of the keyboard are positioned slightly lower than those closer to the edge of the keyboard, making it more pleasant and comfortable to use.
