Gaming speakers Onikuma L2

Ref: 6972470562637

Onikuma L2 gaming speakers

Onikuma L2 gaming speakers will provide you with an unforgettable sound experience during any game. They offer exceptional sound quality that will make every detail in your games even more realistic. You can connect them both wired via USB port and wirelessly via Bluetooth, and with RGB backlighting, they will give your gaming station a unique look.

Rediscover the world of sound

Immerse yourself in virtual reality with the Onikuma L2! With an RMS power of 5W x2 and an impedance of 4Ω, the speakers deliver amazingly clear sound that brings out the finest sound details. The wide frequency response of 50Hz to 16kHz means that no sound will escape your attention - from deep bass to soft treble tones. Now you'll hear every footstep of your opponent, subtle ambient noises and sound effects in your games!

Light up your gaming station

Create an amazing atmosphere during any game. The speakers are equipped with colorful RGB backlighting, so they fit perfectly into the trend of modern gaming devices, giving your stand a unique character. What's more, you can freely choose from a variety of lighting effects using the large dial.

Freedom of connection choice

Onikuma L2 speakers offer various connection options. You can connect them to your computer or laptop with a wired USB cable for a stable and reliable connection. Want to play your favorite songs from your smartphone or tablet? No problem! You will successfully pair the speakers with the device of your choice via Bluetooth. The decision is up to you!
