Smart LED lightstrips controller Sonoff L2-C Wi-Fi

Smart LED lightstrips controller Sonoff L2-C

Sonoff L2-C is a practical kit that will allow you to customize your RGB LED L2 lightstrip and conveniently control it from a distance. In the package you will find a Wi-Fi controller compatible with the eWeLink application, as well as a remote control with 24 buttons, with which you can remotely control your lights. Change the colors of the light and discover all the possibilities that the L2-C offers!

Distance control with the eWeLink app

The Wi-Fi controller allows you to pair your L2 lightstrip with the eWeLink app, which lets you control your lighting from anywhere - not just from home, but also from work or an overseas hotel, for example. Using it, you can check if the light is on, turn it on or off, and adjust its parameters at any time. Just a few taps on your phone or tablet!

Compatible with your smart assistant

L2-C also allows you to control your lighting with voice commands. The Wi-Fi controller stands out for its compatibility with Amazon Alexa and Google Assistant. You don't even have to get up from your chair to turn the lights on or off - just say a few simple words.

Explore the possibilities of the remote control
The included remote control also offers a number of interesting possibilities. Using it, you can not only turn the light on or off, but also adjust its brightness and color. Full control is at your fingertips - take advantage of this practical Sonoff device and introduce a bit of color into your home.

Series of interesting modes
This is not the end! The L2-C allows you to synchronize the L2 LED strip with music, so you can, for example, create a unique atmosphere at a party. You also have a choice of several light modes and DIY modes that will allow you to make your own personalized settings.
