Hair removal IPL Ulike Air3 UI06 (pink)

Say goodbye to traditional hair removal methods. The Ulike Air 3 is a IPL epilator that will work well for areas such as legs, armpits, shoulders, bikini area or above the upper lip. The product also allows you to choose between 3 energy levels and 2 modes. What's more, it ensures safe use. In addition, it offers a cooling function to prevent burns. You'll find accessories included to use the Ulike Air 3 safely and comfortably.

### 3 energy levels

The Ulike Air 3 IPL epilator offers 3 levels of energy, so it will work well for different skin types. The Soft level features a high irradiation frequency and will work well for epilating sensitive areas, such as the bikini area. It is suitable for sensitive skin and dark complexions. The Body level offers a slightly weaker irradiation frequency and is designed for medium-thick hair. It will allow you to epilate areas such as the shoulders. On the other hand, you'll use the Powerful level to epilate thicker hairs, such as on the legs.

### 2 work modes

The Ulike Air 3 offers 2 modes that you can use depending on the body part you are epilating. Continuous mode is suitable for larger areas, for example, arms or legs. Single mode, on the other hand, will get rid of unsightly hairs above the upper lip and on the fingers. Use the epilator 3 times a week for the first 1-2 weeks, and twice a week for the next 3-5 weeks. After 5 weeks, use the device every 2 or

4 weeks.

A few steps to smooth skin

Using the Ulike Air 3 will not cause you any problems. First, remove hair from all the parts you want to treat with the epilator - to do this, use the supplied razor. Then connect the device to a power source and put on the protective goggles. Then turn on the device and set the mode and energy level. Apply the epilator to your skin and press the dedicated button. The device will automatically turn off after 3 minutes of non-use.
