

Professional Tripod PGYTECH MANTISPOD 2.0 (W/O HEAD)

Ref: 6970801338821

Professional Tripod PGYTECH MANTISPOD 2.0 (W/O HEAD)

PGYTECH MANTISPOD 2.0 professional tripod (1/4 inch mount)

The innovative MantisPod 2.0 tripod is a must-have for any vlogger! Thanks to its multiple modes, you can materialize any creative invention and unobstructedly record handheld, change angles from high to low and much more. The Cold Shoe adapter allows you to mount additional accessories. The product does not have a head, but is equipped with a 1/4" screw and is compatible with all cameras, camcorders and phones weighing up to 2 kg. Thanks to its foldable design, the product will be great for traveling and will allow you to capture special moments!

Awaken your creativity with Mantis mode

The MantisPod 2.0 tripod will amaze you with the number of possibilities it offers. The Mantis mode allows you to hang the tripod in the place of your choice - on a tree, a railing, a fence - almost anywhere! This will give you a unique recording angle and create professional video footage. Are you worried that the product will not provide enough stability for your equipment? Don't be! The tripod provides up to 3 points of support, and its handle is made of solid aluminum alloy, so you can record interviews, dynamic shots and more without worry. Take the quality of your recordings to a new level!

A variety of recording modes

Mantis mode isn't the only one PGYTECH tripod offers. Realize all your creative ideas with High-angle, Low-angle, Handheld and Briefcase

modes. Do you often conduct live broadcasts? Or do you like to record travel reports? Or want to brag on social media about the adorable footage of your pet? With the MantisPod 2.0 model, anything is possible! Conveniently switch between modes, record with up to 120° tilt (you need to equip yourself with a head to rotate the camera 360°) and create unique content.

Achieve the comfort of your dreams while recording

Record with unparalleled freedom! PGYTECH's product is designed with convenience in mind, so you can efficiently change from tripod to boom and vice versa without having to adjust the camera angle. The Cold Shoe mount allows you to easily mount additional accessories, such as a microphone or lighting, and the 1/4" hole guarantees wide compatibility. As you can see - every detail has been taken care of!

A design that will delight you

Ensure the highest level of safety for your equipment. PGYTECH tripod is made of aluminum alloy and nylon, which is reinforced with fiberglass. The legs of the MantisPod 2.0 model are made of non-slip material. The solutions used made the tripod distinguished by its high strength, it is extremely stable and can bear a load of up to 2 kg. The weight of the product is only 220 g, which, combined with the foldable design, allows you to tuck it into a bag or backpack and allows convenient transportation. Have the MantisPod 2.0 always with you and create unique materials anywhere!
