

## Filters PolarPro ND8/PL, ND32/PL, ND128/PL for DJI Mini 4 Pr

Filters PolarPro ND8/PL, ND32/PL, ND128/PL for DJI Mini 4 Pro

Ref: 810148700201

PolarPro ND8/PL, ND32/PL, ND128/PL filters for DJI Mini 4 Pro

The Vivid collection for DJI Mini 4 Pro is designed to combine two filter effects (neutral density + polarization) in a single item. The set includes ND8/PL, ND32/PL and ND128/PL filters for high-quality shots in a variety of conditions. To achieve the ND16/PL filter effect, simply use the ND32/PL filter and increase the ISO sensitivity to 200. The filters allow you to take photos in both landscape and portrait modes, and their lightweight design does not interfere with the drone's operation.
