Deskop power station Acefast Z4 GaN PD218W (black)

Acefast Z4 GaN PD218W Black Wall Charger

The Acefast Z4 wall charger is the perfect solution for those who value fast and efficient charging for their devices. It offers 4 charging modes that you can switch between as needed and utilizes GaN (Gallium Nitride) technology for exceptional efficiency. The maximum charging power is an impressive 218W, making it suitable for even the most demanding devices.

Maximum Performance in a Compact Form

The Acefast Z4 uses advanced Gallium Nitride (GaN) technology, allowing it to achieve significantly higher performance and power while maintaining a compact size. Furthermore, GaN technology generates lower temperatures, resulting in higher efficiency and device safety.

Faster Charging Than Ever

Now, charging your devices will take even less time! With four different charging modes, this versatile charger can deliver a maximum power of up to 218W, adapting to the specific requirements of your devices. Moreover, the charger is equipped with a display that shows the voltage and power status of each port in real-time, providing full control over the charging process.

One Charger for All Devices

With the Acefast Z4 wall charger, you can charge up to four devices simultaneously, making it an ideal solution for multitasking users. Whether it's a smartphone, tablet, laptop, or any other device, the charger will provide the necessary power to quickly charge each of them.

Safety First

Charge your devices without worrying about their safety. The Acefast Z4 charger comes with built-in multiple protections that ensure comprehensive protection against potential threats. It effectively guards against overcurrent, overvoltage, overcharging, short circuits, and overheating.
