

Laser distance meter Deko Tools LRD110 (Range 70m)

Ref: 6974491586814

Laser distance meter Deko Tools LRD110 (Range 70m)

Laser distance meter Deko Tools LRD110

The laser distance meter is a practical device that allows you to precisely measure the distance between objects. The Deko Tools product has a $\pm 2\text{mm}$ accuracy and a range of up to 70m. It lets you choose from units such as meters, feet, and inches, and is easy to use with its built-in LCD screen. It also has a spirit level and offers several useful functions. It is powered by 2 AAA batteries (not included).

Precise measurements

The device offers a class II laser with a wavelength of 620-690nm and a range of 70m. It allows you to measure distances in surprisingly short time - one measurement takes only about 0.25s. You can also choose from several available units of length (m, ft, in) and area (m², ft²). What's more, the rangefinder allows you to save up to 20 groups of data from previous measurements.

Many applications

The laser distance meter can be used for many purposes, both at home, for example for renovation work, and in more professional applications. It is used in construction and architecture, among other things. It is useful for taking precise measurements of rooms and land, and will prove indispensable in interior and exterior works.

Improved design

High-quality materials have been used in its construction. This makes the distance meter extremely robust and resistant to damage. The built-in LCD screen gives you quick access to the most important information. The product has also been equipped with a spirit level, thanks to which it is easy to align it in the right way in relation to the surface.

A range of useful features

The Deko Tools distance meter also offers several useful functions to make your work easier. Among other things, it can be used for single and continuous measurement with minimum and maximum values, area measurement, volume measurement and measuring using the Pythagorean theorem. What's more, the laser automatically switches off after 30 seconds of inactivity and the rangefinder switches off after 180 seconds - don't worry if you forget.

Brand

Deko Tools

Model

LRD110-70M

Measuring range

0-70m

Measuring accuracy

±2mm

Length measurement unit

m, ft, in

Area measurement unit

m², ft²

Laser type

620-690nm

Laser class

II, <1mW

Single measurement time

About 0.25s

Display backlight time

30s

Automatic switch off

Laser: after 30s; Distance meter: after 180s;

Power supply

2x AAA 1.5V batteries (not included)

Number of measurements per battery set

About 5000

Working temperature

0-40°C

Storage temperature

-20-65°C

Dimensions

112x41x24mm

Weight

135g

Functions

Single measurement, continuous measurement, maximum/minimum value, area measurement, volume measurement, measurement by Pythagoras theorem
